Culture Flow: Website v1 Structure and Content Brief

Oct 14, 2026 · @Raman

1. Purpose, audience and scope of v1

The v1 site is a small, fast credibility-and-waitlist site: it proves Culture Flow is real and safe, and captures signups before the first program opens on Day 45. A visitor should be able to answer four questions within 60 seconds: who are they, what do they offer, is it safe, and how do I join.

Goals

1. Explain what Culture Flow does in under 10 seconds on the home page.
2. Give parents verifiable trust signals: company details, safety system, policies, named people.
3. Capture waitlist signups (students and parents) and institution enquiries.
4. Give Instagram visitors a landing page that matches the brand and loads fast on mobile.

Audiences

Audience	What they need from the site	Main pages
Students (university age)	What it is, the tracks, why it is not a holiday, how to join the waitlist	Home, Programs, How It Works
Parents (fee-paying)	Safety, legitimacy, return on investment, who is accountable	Safety and Trust, About, FAQ
Partner institutions	Credibility, the 40/40/20 model, how to partner	Partners, How It Works

In scope for v1: a mobile-first marketing site, a waitlist form, an institution enquiry form, a contact page, and legal pages.

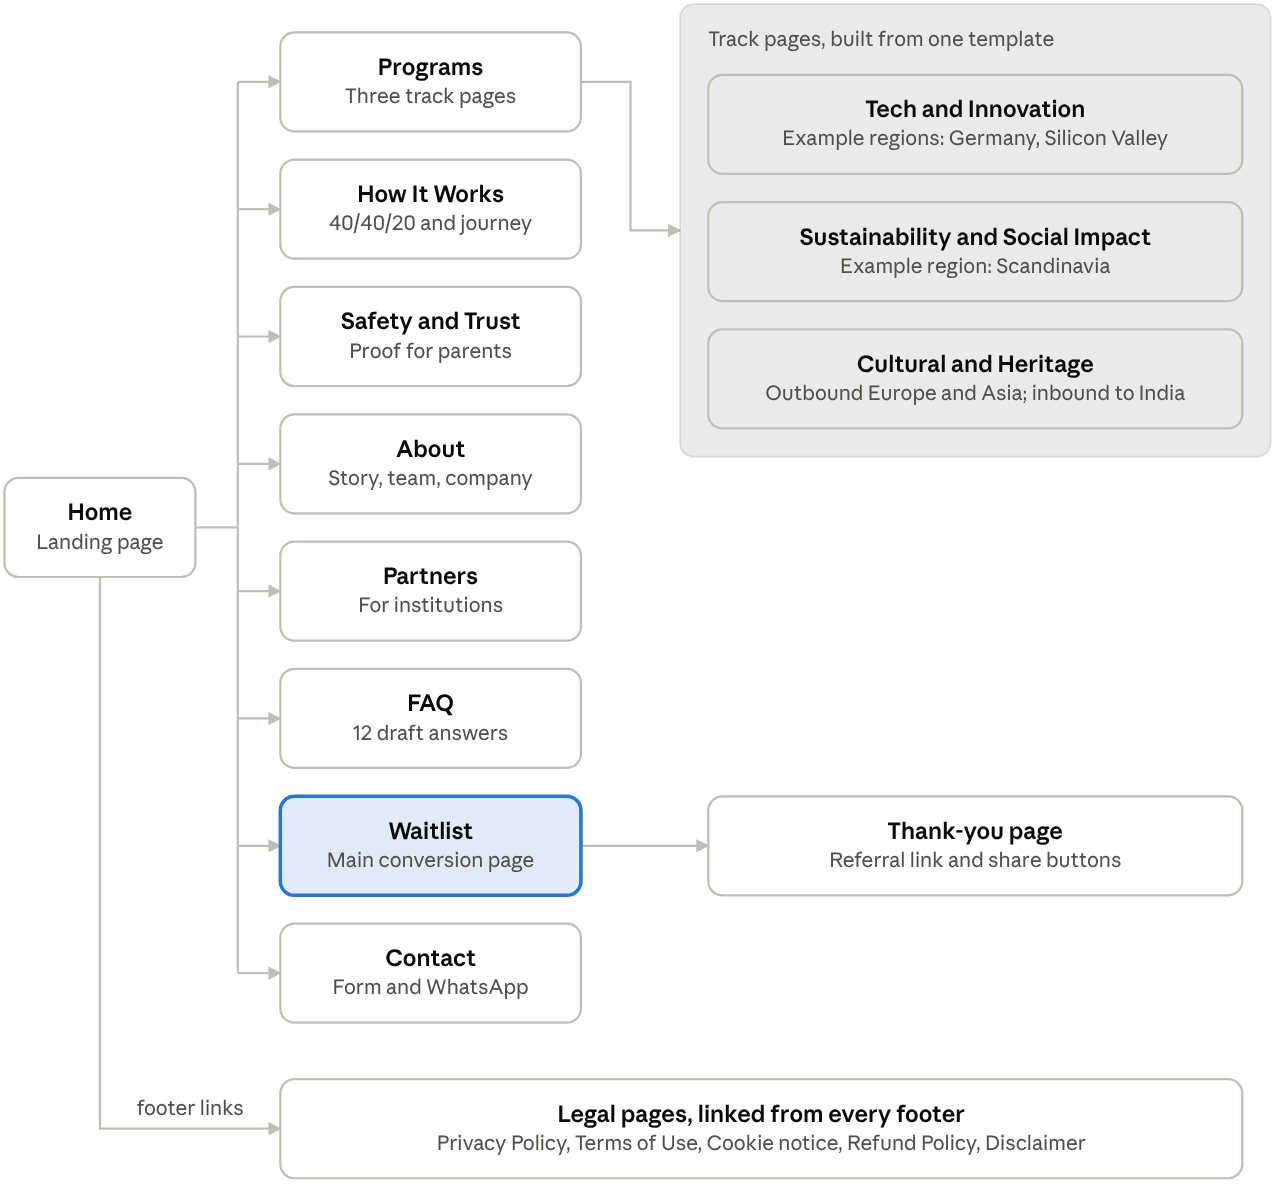

Deferred to the full platform: online enrollment and payments, user accounts and login, program booking, itinerary or pricing calculators, a blog CMS, and multiple languages.

Assumption: most traffic will arrive from Instagram on phones in India, so every layout is designed mobile-first and tested on mid-range Android devices.

2. Sitemap

The v1 site has eight main pages, three track pages built from one template, a thank-you page, and a set of legal pages in the footer.

Home links to eight pages; Programs opens three track pages

site map · 8 main pages, 3 track pages, legal footer

The highlighted Waitlist page is the site's single goal, so every page ends with a link to it. Build Waitlist and Safety and Trust first, because they carry conversion and trust.

3. Global elements

Four elements appear on every page, so build them once as shared components.

Element	Content	Behaviour
Announcement bar	"First program opens [Day 45 date]. Join the waitlist for priority access."	Dismissible, links to the waitlist page; remove after launch
Header	CF monogram and wordmark; nav: Programs, How It Works, Safety and Trust, About, Partners, FAQ; gold button "Join the Waitlist"	Sticky on scroll; hamburger menu on mobile with the waitlist button always visible
Trust strip	1:15 chaperone ratio, vetted local partners, emergency medical insurance, parental indemnity framework	Four icons with one-line labels; shown on Home and repeated above the footer on Safety and Programs
Footer	Short description, nav links, contact email and WhatsApp number, Instagram and LinkedIn links, registered company name, CIN and GST number, legal links, copyright	Same on all pages; company details are text, not an image, so they are searchable

Primary call to action everywhere: "Join the Waitlist". **Secondary:** "Talk to us" (contact) and, on the Partners page only, "Partner with us".

Floating WhatsApp button: a click-to-chat link to the Culture Flow business number with a pre-filled message. It costs nothing and gives parents a fast, human route to ask questions.

4. Page-by-page content

Each page below lists its sections in top-to-bottom order with draft copy. Copy marked [FILL] must come from the Culture Flow team before build. Draft headlines are suggestions to be refined.

4.1 Home

Order	Section	Content and draft copy
1	Hero	Headline: "Two weeks abroad. A syllabus, not an itinerary." Subline: "Short international immersions for university students: hands-on learning, real industry access and guided reflection." Buttons: Join the Waitlist, Explore Programs. Navy background with the gold flight-trail motif; no tourist stock photos
2	What we do	Three short lines: 7 to 21 day programs; a fixed 40/40/20 learning model; three themed tracks
3	The 40/40/20 model	A simple bar or ring graphic: 40% academic rigor and workshops, 40% industry and cultural immersion, 20% guided synthesis and reflection. Link to How It Works
4	Three tracks	Three cards: Tech and Innovation Bootcamps, Sustainability and Social Impact, Cultural and Heritage Immersions. Each has one line, an example destination region and a Learn more link
5	A sample day	A timetable graphic (for example 9:00 workshop, 13:00 industry visit, 17:00 reflection). Mark it "Illustrative" until real itineraries exist
6	Safety strip	The four trust points from the global trust strip, with a link to Safety and Trust
7	Who we are	Two or three lines on the founder and mission, a photo, and a link to About
8	Waitlist band	Short form: name, email, I am a (student or parent), city. Copy: "Be first in line when the first program opens."

Order	Section	Content and draft copy
9	FAQ preview	Three questions from the FAQ page with a link to all

4.2 About (Who we are)

Order	Section	Content and draft copy
1	Our story	[FILL] 150 to 200 words from the founder: why short, structured immersions, and what problem Culture Flow solves for students and parents
2	Mission and approach	One sentence mission, then three principles (for example: learning first, safety as a system, reflection turns experience into outcomes)
3	The team	Founder and key people: photo, name, role, two-line bio, LinkedIn link. Add program lead and any advisors when confirmed. Real names and faces matter most to parents
4	Company details	Registered company name (Culture Flow Pvt. Ltd.), CIN, GST number, registered address, year of incorporation. [FILL]
5	Partners	Logos of confirmed institutional, DMC or insurance partners only, with written permission. Hide the section if none are confirmed
6	Call to action	Join the Waitlist

4.3 Programs (overview and three track pages)

The overview page lists the three tracks. Each track gets its own page built from one shared template, so the tech team builds the template once.

Order	Overview page section	Content
1	Intro	"Short, structured immersions of 7 to 21 days." One paragraph on the 40/40/20 model

Order	Overview page section	Content
2	Track cards	Three large cards, each linking to its track page
3	Every program includes	Icons: 1:15 chaperone ratio, vetted local partners, emergency medical insurance, parental indemnity framework, structured timetable
4	First program	"First program announced [Day 45 date]." Show destination and dates once confirmed [FILL]
5	Pricing	"Pricing published at launch." Replace with a price range once decided [FILL]
6	Waitlist CTA	Join the Waitlist

Track page template (repeat for Tech and Innovation, Sustainability and Social Impact, Cultural and Heritage):

Order	Section	Content
1	Hero	Track name, one-line promise, example destinations, button Join the Waitlist (track pre-selected in the form)
2	Who it is for	Year of study, interests, no prior experience required [CONFIRM]
3	What you will learn	Four to six workshop or module titles
4	Industry and cultural immersion	Types of organisations and experiences, named only once confirmed
5	A sample day	Illustrative timetable graphic
6	Where	Example destinations: Germany and Silicon Valley for Tech; Scandinavia for Sustainability; Europe and Asia outbound plus inbound into India for Cultural and Heritage
7	What you leave with	Project or portfolio piece, mentor feedback, certificate. Mark each item [CONFIRM] until it is guaranteed
8	Safety summary	Trust strip and link to Safety and Trust

Order	Section	Content
9	Waitlist form	Same form, track pre-selected

4.4 How It Works

This page explains the model and the student journey, and is the one partner institutions read most closely.

1. **The 40/40/20 model.** Three short blocks. 40% academic rigor and hands-on workshops; 40% industry and cultural immersion; 20% guided synthesis and reflection. Each block gets two or three example activities [FILL].
2. **The journey.** Join the waitlist, apply and get selected, attend a pre-departure briefing (parents invited), complete the program, then reflect and receive outcomes.
3. **A week at a glance.** One illustrative timetable showing how the three blocks sit across days.
4. **Why short immersions.** Three honest points on why 7 to 21 days works: fits inside a semester break, lower cost and commitment than a semester abroad, focused outcomes.
5. **Call to action.** Join the Waitlist; for institutions, Partner with us.

4.5 Safety and Trust

This is the most important page for parents. It must be specific, not reassuring in general terms, so every claim needs a fact or a document behind it.

Order	Section	Content
1	Headline	"Safety is a system, not a promise." One paragraph on why
2	Four pillars	**1:15 chaperone ratio** (what it means in practice). **Vetted local partners** (how they are vetted: licences checked, references, site visits [FILL]). **Emergency medical insurance** (insurer name, cover summary [FILL]). **Parental indemnity framework** (plain-language explanation of what parents sign and why)

Order	Section	Content
3	Before departure	Parent briefing, medical and emergency contact forms, travel documents checklist
4	During the program	24x7 emergency contact, daily check-ins, how and when parents receive updates [CONFIRM]
5	If something goes wrong	A numbered emergency protocol: who is contacted, in what order, within what time [FILL]
6	Documents to download	PDFs: safety policy, sample parent consent form, insurance summary. These sit behind no form so parents can read them freely
7	Who is accountable	Names and photos of the founder and program lead, with a link to About and the registered company details
8	Ask us anything	WhatsApp button and email for parent questions

4.6 Partners (for institutions)

Order	Section	Content
1	Headline	"Bring structured global learning to your students."
2	What we provide	Curriculum, vetted local delivery, chaperones, insurance, and a reflection framework [CONFIRM each]
3	Partnership models	Co-branded cohorts, faculty-led programs, custom short immersions. One short paragraph each [FILL]
4	The 40/40/20 model	A summary with a link to How It Works
5	Enquiry form	Institution name, your role, email, phone, expected cohort size, preferred track, message
6	Ask Your College	A short form for students and parents to nominate their institution: college name, contact person if known, their email. This turns consumer demand into institutional leads

4.7 FAQ

Build as an accordion grouped under four headings, with FAQ structured data for search. Answers below are drafts; replace [FILL] with confirmed facts.

Group	Question	Draft answer
Program	What is a micro-immersion?	A 7 to 21 day international program with a fixed structure: 40% academic work and workshops, 40% industry and cultural immersion, 20% guided reflection
Program	Is this a holiday or a tour?	No. Every day follows a timetable with workshops, industry visits and reflection. Free time exists but is not the point
Program	Who can join?	University students. Eligibility by track and year [FILL]
Program	When is the first program?	Announced on [Day 45 date]. Waitlist members hear first
Safety	How many chaperones are there?	One chaperone for every 15 students (1:15)
Safety	What if a student falls ill or has an emergency?	Every participant has emergency medical insurance and access to a 24x7 contact. The protocol is on the Safety and Trust page
Safety	Who are your local partners?	Local partners are vetted before we work with them. Vetting steps [FILL]
Parents	What does the parental indemnity framework mean?	A clear written agreement that sets out responsibilities, consent and emergency authority. A sample is available to download
Parents	What is the cost?	Pricing is published at launch. Price range [FILL]
Parents	What is the refund policy?	[FILL] The policy will be published in full before any payment is taken

Group	Question	Draft answer
Waitlist	What does joining the waitlist cost?	Nothing. It carries no obligation to enrol
Waitlist	What do I get for joining?	Priority access when the first program opens, plus updates. Referral perks [FILL]

4.8 Waitlist (main conversion page)

One short form, reused as the Home band and on each track page. Keep it to the fields below, because every extra field lowers completion.

Field	Type	Required
Full name	Text	Yes
Email	Email	Yes
Mobile or WhatsApp number	Phone	Optional
I am a	Dropdown: Student, Parent, Institution representative	Yes
City	Text	Yes
College or university	Text (shown for students)	Optional
Year of study	Dropdown (shown for students)	Optional
Track interest	Multi-select: the three tracks	Optional
How did you hear about us	Dropdown: Instagram, friend, college, other	Optional
Referral code	Text, filled automatically from a referral link	Optional
Consent	Checkbox with link to the Privacy Policy	Yes

After submitting: a thank-you page with the person's own referral link and share buttons (WhatsApp, copy link), and a confirmation email. Store every entry in a spreadsheet or CRM with a timestamp and the page it came from.

4.9 Contact

Contact email, a WhatsApp number, a short form (name, email, topic dropdown, message), the registered address, and social links. State the response time, for example "We reply within one working day" [CONFIRM].

5. Legal and compliance pages

The site collects names, emails, phone numbers and student details, so these pages must exist at launch. Have a lawyer review the final wording; the table is a checklist, not legal advice.

Page	Must cover	Linked from
Privacy Policy	What data is collected, why, how long it is kept, who it is shared with, how to withdraw consent or request deletion; aligned with India's Digital Personal Data Protection Act, 2023	Footer, every form
Terms of Use	Rules for using the site, intellectual property, limits of liability	Footer
Cookie notice	What analytics cookies are used and how to opt out. Add a consent banner if analytics tools set cookies	Banner and footer
Grievance contact	Name and email of the person who handles privacy complaints	Footer and Privacy Policy
Refund and Cancellation Policy	Publish in full before any payment is accepted. Draft now even if enrollment opens later	Footer, FAQ
Disclaimer	Itineraries, destinations and outcomes are illustrative until confirmed; no guarantee of visas, placements or admissions	Footer, program pages
Company details	Registered name, CIN, GST number, registered address, as text in the footer and on About	Footer, About

Rules for the tech team: every form carries an unticked consent checkbox linking to the Privacy Policy; no data is collected before consent; if a visitor could be under 18, add an age confirmation. **Rules for copy:** never promise a job, internship, visa or admission outcome, and never show a testimonial or partner logo you cannot document.

6. Brand and design requirements

The site should feel clean, institutional and prestigious: navy-led, generous white space, one gold accent for action. Use the existing brand kit exactly.

Token	Hex	Use
Deep Navy	#002244	Primary background, headings on light, navy sections
Midnight	#050A30	Footer, hero overlays, deepest sections
Sand/Gold	#C89C66	Buttons, accents, dividers, highlights
Crisp White	#FCFCFF	Page background, text on navy

Contrast rules (checked): navy text on gold is about 6.4 to 1 and passes accessibility AA, so gold buttons use navy text. White text on gold is about 2.5 to 1 and fails, so never use it. Gold text works on navy, but not on white.

Typography: Oranienbaum for headings and display text. TT Norms for body and UI text. Oranienbaum is a free Google Font. TT Norms is a paid commercial font, so the team must confirm a web-font licence before using it; if there is none, use a free sans such as Manrope or DM Sans as the body font. Body text 16 px minimum on mobile; headings scale down cleanly to a 360 px wide screen.

Logo: the interlocking CF monogram with the ascending flight trail, supplied as SVG. Provide a full-colour version, a white version for navy backgrounds, a favicon (32 and 512 px) and a social-share image (1200 by 630 px). Keep clear space equal to the height of the "C" on all sides and never recolour or stretch it.

Imagery rules:

1. Prefer real photography from scouting visits, pilot sessions and partners, with written permission.
2. Show structure: timetables, workshops, notebooks, industry visits, people at work.

3. No generic tourist stock photos, no AI-generated destination scenes, no fake testimonials. These push the brand toward "holiday" and "scam".
4. Until real photos exist, use brand-colour graphics, the flight-trail motif and typographic layouts.

Tone of voice: precise, confident, warm. Use program, cohort, immersion, syllabus, outcomes. Avoid trip, tour, holiday, package, dream destination, once in a lifetime.

Motion: subtle only. The flight trail may draw once on the hero; respect the reduced-motion setting and keep it under one second.

7. Technical requirements

Build v1 as a fast, mostly static site with a small form backend, hosted cheaply on a CDN, so it loads quickly on Indian mobile networks and can be replaced or extended when the full platform launches. The stack is the tech team's call; the requirements below are what the result must meet.

Area	Requirement
Approach	Static or server-rendered pages (for example Astro, Next.js or similar) on a CDN host. A heavy CMS is not needed for v1
Mobile first	Design and test at 360 px width first; test on mid-range Android phones and in Instagram's in-app browser, since most visitors will arrive from Instagram
Performance	Largest content paint under 2.5 s on a 4G connection; page weight under 1.5 MB; images in WebP or AVIF, lazy loaded; fonts subset and preloaded
Forms	Waitlist, institution enquiry, Ask Your College and contact forms; server-side validation; spam protection (honeypot plus a CAPTCHA alternative); confirmation email; entries stored with timestamp, source page, UTM values and the Privacy Policy version the person accepted; CSV export

Area	Requirement
Referral	Each waitlist entry gets a unique code; a link with ?ref=CODE fills the referral field and credits the referrer; the admin view shows referral counts per person
Analytics	Privacy-friendly analytics or GA4; events for waitlist submit, WhatsApp click, partner enquiry, FAQ open, outbound social clicks; capture UTM parameters from Instagram links
SEO	Unique title and description per page; Organization and FAQPage structured data; sitemap.xml and robots.txt; Open Graph and Twitter share images; clean URLs; canonical tags
Accessibility	WCAG 2.1 AA: keyboard navigation, visible focus, alt text, sufficient contrast, reduced-motion support
Security	HTTPS everywhere, security headers, no secrets in client code, two-factor on hosting and domain accounts, regular backups of form data
Content editing	The team can edit FAQ, team bios, dates and copy without a developer, through a simple CMS or content files with a clear guide
Email and domain	Custom domain with www redirect; business email on the domain with SPF, DKIM and DMARC set so confirmation emails reach inboxes
Browsers	Last two versions of Chrome, Safari, Edge, Firefox and Samsung Internet
Monitoring	Uptime monitor and a basic error alert

Rough effort (estimate for the tech team to confirm): about one week for design, one to two weeks for build, and one week for content loading, testing and fixes.

8. Content and assets Culture Flow must supply

The build cannot finish until these are in hand, so start collecting them now, in parallel with design. Tick each as it is delivered.

Company and brand

- [ ] Registered company name, CIN, GST number, registered address, year of incorporation
- [ ] Logo files: SVG full-colour, SVG white, favicon source, social-share image
- [ ] TT Norms web-font licence, or approval to use a free substitute

People

- [ ] Founder photo and 150 to 200 word story
- [ ] Team and advisor photos, names, roles, two-line bios, LinkedIn links

Program facts

- [ ] Two or three example activities for each part of the 40/40/20 model
- [ ] Description, example destinations and learning outcomes for each of the three tracks
- [ ] Eligibility rules, first program date, and price range (or the decision to publish at launch)
- [ ] Confirmed outcomes students leave with (project, certificate, mentor feedback)

Safety proof

- [ ] Safety policy PDF, sample parent consent form, insurance summary PDF
- [ ] Insurer name and cover summary
- [ ] Local partner vetting steps and emergency protocol

Media and partners

- [ ] Real photos or video (scouting visits, pilot session, partners) with written permission
- [ ] Partner logos with written permission, only for confirmed partners

Accounts and legal

- [ ] Domain and DNS access, business email, WhatsApp Business number, Instagram and LinkedIn URLs
- [ ] Analytics account and a place to store form entries
- [ ] Lawyer-reviewed Privacy Policy, Terms, Refund Policy and Disclaimer, plus the named grievance contact

9. Launch checklist and what comes in v2

The site is ready to go live when every item below is ticked, ideally a week before the Instagram campaign starts so the link in bio is stable.

Before launch

- [ ] Every [FILL] and [CONFIRM] in this brief is resolved or the section is hidden
- [ ] All pages checked on small and large phones, tablets and desktop
- [ ] Tested inside Instagram's in-app browser, including the link-in-bio flow
- [ ] Every form tested end to end: entry stored, confirmation email received, referral code works
- [ ] Legal pages live and linked; consent checkbox required on all forms
- [ ] Analytics events firing and UTM values captured
- [ ] Share previews correct on WhatsApp and Instagram (title, description, image)
- [ ] Speed and accessibility checks passed; custom 404 page in place
- [ ] Backups, uptime monitoring and two-factor access in place

Deferred to v2 (the full platform)

- Online application, enrollment and payments, with the refund workflow
- User accounts and a parent dashboard
- Itinerary pages and booking for each confirmed program
- Verified student and parent reviews page, once real cohorts have finished
- A resources or blog section
- Hindi and other language versions
- CRM automation and an institution portal
